

UNICITY Bios Life E

Getting the greens and plant-based nutrients we need can be challenging, despite widespread recognition of their importance for health. Furthermore, many commercial matcha products are laden with added sugars and low-quality ingredients, compromising their health benefits.

Bios Life E undergoes a meticulous growth process to enhance its natural potency, including higher levels of chlorophyll and catechins. It features a sour apple flavor, making it the best-tasting matcha around, and contains no added sugars or artificial ingredients.

Bios Life E is a scientifically-backed energy drink for individuals living a busy lifestyle that need a convenient, low-calorie way to increase energy and nutrient levels. The proprietary blend of Chi-Oka Matcha Green Tea, B Vitamins, Antioxidants, and other unique ingredients are vital in boosting general health, thermogenesis, and mental performance. Bios Life E will elevate energy levels and improve mental focus to keep you going strong all day long.

Benefits

-  Supports physical and mental performance
-  Promotes relaxation and focus
-  Supplies your mind and body with a boost of energy
-  Helps you stay energized without the sugar crash or caffeine jitters
-  Provides important plant compounds with antioxidant-like properties

Features

- Low sugar nutritious energy drink.
- It provides a smooth and sustained energy boost.
- It contains potent antioxidants which protect the cells from free radicals damage.
- It provides right combination of electrolytes to maintain electrolytes balance for good health.

Use

Mix one packet with 8–10 oz. water. Drink before exercising, during occasional periods of stress and strain, or anytime you need an extra boost of energy.

Ideal for

- Anyone who needs a mental and physical energy boost
- Individuals looking for a high-energy, low-sugar drink
- Those looking for a smooth and sustained energy boost.

Ingredients

Matcha: A type of green tea (*Camellia sinensis*) that is shade-grown and prepared in a way that allows the leaves to retain higher amounts of the important compounds that make matcha so good for you. While green tea is prepared by allowing the leaves within a tea bag to steep in hot water, matcha is prepared by grinding the entire leaf into a fine powder before being mixed with water. This unique preparation results in more bioactive components, such as chlorophyll and catechins.

L-carnitine: Often used in pre-workout drinks, L-carnitine plays a critical role in mitochondrial energy production from long chain fatty acids.

L-theanine: L-theanine is an amino acid that has been shown to promote a sense of mental calm and focus. As such, it has been shown to help counter jitters caused by caffeine. In addition, L-theanine is also particularly concentrated in matcha (as opposed to other green tea) due to its unique harvesting methods.

B vitamin: B vitamins are essential vitamins in our diets that play an important role in the conversion of food into energy.

Try this

Blend into protein smoothies for an energy-boosting beverage

Mix with any of our Unimate flavors for a 1–2 punch of energy

Mix with Oasis for a hydrating refresh

For an extra chlorophyll boost, add a scoop of Super Chlorophyll

UNICITY FAQs

Who should take Bios Life E?

Bios Life E is recommended for healthy adults. It is not suitable for pregnant or nursing women, children, or people sensitive to caffeine.

How much caffeine is in Bios Life E?

The product has been tested for an upper limit of caffeine and it has about as much caffeine as a cup of premium coffee.

However, since natural ingredients can have some variation, the caffeine amount is not standardized.
