# Super Green +

Family, career, travel, hobbies—it can be hard to keep up with the opportunities for adventure and fulfillment in life. It can be even harder to keep up with nutrition. As we age, the body has a much more difficult time handling the demands we place on it as various systems become less efficient. So how can we support our body while also keeping up with our full, vibrant lives?

Unicity Super Green + is a nutrient-rich drink mix that encourages you to stay hydrated every day and supports metabolic health. Its formula with phytonutrients and niacin provides you with chlorophyllin, supports energy metabolism, and contributes to your overall well-being. Super Green + has a pleasantly subtle taste and can be enjoyed with water or added to your favorite beverages. This helps you stay hydrated while providing important nutrients that help you perform your best in life's various challenges.

**Sodium Copper Chlorophyllin:** Sodium copper chlorophyllin (SCC) is a stable derivative of chlorophyll, a green pigment found in plants that convert sunlight into energy. The chlorophyllin in Super Green + is sourced from mulberry leaves, a superfood with a high content of nutrients.

**Spirulina:** Anciently used by the Aztecs and popularized after its successful use on NASA space missions, spirulina has proven to be a superb dietary ingredient that has survived the test of time. Phycocyanin, spirulina's main active component exhibits a vibrant, blue color and functions much like chlorophyll.

**Niacin:** Also known as vitamin B3, niacin plays an important role in converting food to energy. Niacin is used to synthesize NAD+, which is a vital compound in the body that is actively involved in a host of metabolic pathways and immune cell function.\*

(\*Nicotinamide, one of the two main forms of niacin, is used in this formulation.)

# Super Green +

## FAQs

### What is the difference between Super Green and Super Green +?

Super Green + contains 50% more sodium copper chlorophyllin per serving than Super Green. Super Green + also contains niacin (vitamin B3) and spirulina, which are not in Super Green.

### What is the difference between chlorophyll and sodium copper chlorophyllin?

Chlorophyll is the green pigment in plants that is responsible for photosynthesis, while chlorophyllin is a derivative of chlorophyll which is created by adding sodium and copper.

Additionally, sodium copper chlorophyllin is a water-soluble version of chlorophyll that allows us to create a drinkable version of chlorophyll that can be added to your favorite drinks.

### Where is the chlorophyll in Super Green + sourced from?

The chlorophyll in Super Green + is sourced from mulberry leaves.

### What is spirulina and where is it found?

Spirulina is an aquatic plant much like seaweed and can generally be found in freshwater lakes, rivers, and ponds. At Unicity, spirulina are gathered from farms with a controlled environment, which helps ensure that quality is maintained.

### Does drinking Super Green + break my fast?

No. Super Green + is a zero-calorie drink mix formulated with resistant maltodextrin and does not have a significant effect on blood glucose levels. Drinking Super Green + will not break your caloric fast.

### Is Super Green + safe for breastfeeding/expecting moms?

#### Can children take this product?

We advise pregnant women and breastfeeding women to consult their doctor for advice on all nutrition matters, especially dietary changes. Also, Unicity does not test products on children, pregnant women, or nursing women; therefore, Unicity cannot recommend usage for these demographics.
