

Decaf Unimate

Ultra-concentrated yerba mate drink mix

Mint chocolate brownie flavor with other natural flavors

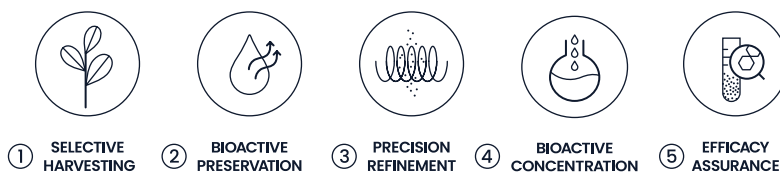

Unimate helps make great days the rule, not the exception — now in a decaffeinated formula. Mint Chocolate Brownie is the first decaffeinated Unimate flavor offered in Canada: rich, indulgent, and designed for feel-good moments with less caffeine.

The yerba mate leaves in Decaffeinated Unimate undergo Unicity's unique BioSelect™ Process, followed by a proprietary decaffeination process that removes caffeine while preserving the beneficial compounds. The result is an extract containing up to 10 times the chlorogenic acids found in a typical cup of coffee, and 20 times those found in other commercially available yerba mate products.

Enjoy it morning, afternoon, or evening — with the flexibility to fit any lifestyle.

The BioSelect™ Process

Unimate is uniquely powerful thanks to **Unicity's BioSelect™ Process**: select harvesting, bioactive preservation, precision refinement, bioactive concentration, and efficacy assurance.

Decaf Unimate

Mint chocolate brownie flavor with other natural flavors

Features

High-quality, purified, ultra-concentrated yerba mate

Proprietary decaffeination process that preserves beneficial compounds

Less than 15 mg of caffeine per serving

No added sugar — naturally sweetened

No artificial colors or preservatives

Rich source of chlorogenic acids, mate saponins, and antioxidants

Certifications

Gluten free

- Anyone looking for a satisfying, evening-friendly alternative to caffeinated drinks
- Athletes
- Students

Designed for Health

Today, we face a health crisis unlike any the world has ever seen. Despite scientific advancements in medicine and health care, people are unhealthier than ever.

The good news is that this pervasive global health decline is completely reversible. As The Health Intervention Company, Unicity is committed to combating today's health crisis by developing products that are obsessively backed by science, rigorously tested, and masterfully produced — all to help millions around the world live better lives.

Frequently asked questions

Is Decaffeinated Unimate completely caffeine-free?

No — decaffeinated does not mean caffeine-free. Each serving contains less than 15 mg of caffeine, which is significantly less than a standard cup of coffee. It is suitable for those who are caffeine-sensitive or want to avoid caffeine later in the day.

Who should not take Decaffeinated Unimate?

Decaffeinated Unimate is intended for adults. Not suitable for pregnant or nursing women, children, or individuals advised to avoid caffeine entirely. Do not exceed the recommended daily use.

Can I take it at night?

Yes — the low caffeine content means it won't disrupt sleep for most people. Many users enjoy it as part of an evening wind-down or post-dinner routine.

Ingredients

Green yerba mate leaf

Sourced from the *Ilex paraguariensis* plant native to South America and used by indigenous people for centuries. A natural source of polyphenols with potent antioxidant properties.

Yerba mate contains naturally occurring:

- **Chlorogenic acids** — Chlorogenic acids are polyphenolic compounds found in plants and seeds, such as yerba mate, green coffee beans, and tea.
- **Mate saponins** — Molecules specific to the yerba mate plant.
- **Theobromine** — The mood-boosting compound found in high-quality chocolate.
